

Request for No Parking Sign Study Evaluation

City Ordinance Chapter 305.050 establishes the office of the City Traffic Engineer as City Engineer. The City Traffic Engineer shall determine the installation and proper timing and maintenance of traffic control devices, conduct engineering analyses of traffic accidents and devise remedial measures, conduct engineering investigation of traffic conditions, plan the operation of traffic on the streets and highways of the City, and cooperate with other City Officials in the development of ways and means to improve traffic conditions, and carry out the additional powers and duties imposed by ordinances of the City.

Prior to performing and investigating, requests must be received from five (5) individual property owners living along the roadway. The request must be submitted to the City Engineer. The requests should be in writing and should clearly list the limits for the “no parking” zone and the desired side of the street that is to be designated as “no parking”.

Upon receipt and verification of these requests, the City Engineer will perform an investigation to determine if “no parking” sign(s) are warranted. If the signs are warranted, then the City Engineer shall authorize the installation of the no parking sign(s) as funding is available.

Location of Requested No Parking Sign Study: _____
